Backline counter

Dishwashing and food preparation cannot take place at the same time, the processes need to be separated or physical separation is required between dishwashing and food prep area.

Adequate facilities are to be provided for the cleaning, disinfecting and storage of working utensils and equipment. These facilities are to be constructed of corrosion resistant materials, be easy to clean and have an adequate supply of hot and cold water.

Dishwashing

Industrial dishwasher is required at any new construction store and at all cluster A stores with separate dishwashing room. Under counter dishwasher can be installed in smaller locations where there are no dishwashing room. Manual

dishwashing in store is permitted in smaller cluster C stores.

FOOD PREPARATION AREAS ARE REQUIRED TO HAVE:

- Separate Hand sink.
- Separate Equipment sink (in dishwashing room equipped with hose).
- Separate Production sink if any food delivered is washed (salad, tomato, etc).
- Sufficient stainless-steel shelving for food utensils, containers etc.
- Stainless steel is prerequisite material to be used.
- Food prep counter (stainless-steel surface) installed that allows food to be kept at cold temperatures
- A suitable freezer, refrigerated and room temperature storage for food is required in the food preparation area of back room kitchen.
- Waste bins with covers and foot pedals.

Cleaning chemicals

Must be kept in designated chemical storage area under the sink or in cleaning room.

Floor drainage must be covered.

Windows in food preparation area should not be possible to open. Always provide appropriate lighting suitable for food premises.

5. Cold counters

COLD REMOTE COUNTER

Stainless steel backline cold counter with 12 or 15 cold drawers and 6 ambient drawers.

KEY BENEFITS:

- 2x GN1/2 in each drawer
- Adjustable feet

Sales floor

Low height impulse coolers and freezers are ideal for fast-moving groceries on the convenience store floor area.

The more we create touch points for shoppers the more we increase sales. Several models can be used individually, lined up together, multiplexed or arranged as an island to promote impulse shopping.

PAY ATTENTION TO:

- Super product visibility and lighting
- Possibility to create more touch points for customers to increase sales
- Integral design to combine refrigerated and ambient units
- Environmentally friendly refrigerant

7. Multidecks

VANILLA **PLUG-IN**

Vertical plug-in refrigerated cabinet particularly attentive to eco-sustainability and energy saving.

KEY BENEFITS:

- Suited to all sales surfaces
 - Fits to any store format and concept
 - Ideal for the preservation of pre-packed products
 - Led lighting under the shelves (option on demand)

11. Packs

ECO2COMPACTA PACK

ECO2Compacta refrigeration pack is dedicated to small size and proximity stores. The cooling capacity can be adjusted from 15kW to 45kW for medium temperatures and from 0 kW to 9 kW for low temperature applications.

KEY BENEFITS:

- Very compact product
- Indoor or outdoor installation
- Low noise level.
- High pressure oil solution from EPTA.
- Easy maintenance concept with one side maintenance access

ECO2Compacta	MT	LT
Cooling capacity min./max. (kW)	15-50	0-18
Compressors	max. 3	max. 2

ECO2LARGE PACK

ECO₂Large refrigeration pack is designed for applications in medium to large size stores. The cooling capacity can be adjusted from 80kW to 180kW for medium temperatures and from 12kW to 60 kW for low temperature applications.

KEY BENEFITS:

- High level of customization
- Booster LT and MT
- High pressure oil solution from EPTA
- ETE and FTE performing systems available on this platform
- Combined onboard FTE 2.0 system available
- Easy maintenance concept

ECO2Large	MT	LT
Cooling capacity min./max. (kW)	80-200	0-60
Compressors	max. 5	max. 3

ECO2MIDDLE **PACK**

ECO₂Middle refrigeration pack is designed for applications in medium size stores. The cooling capacity can be adjusted from 35kW to 121kW for medium temperatures and from 5,5kW to 52 kW for low temperature applications.

KEY BENEFITS:

- Very compact product
- Modular design for manutention and complex installation
- Booster BLTand MT
- High pressure oil solution from EPTA.
- ETE and FTE performing systems available on this platform
- Easy maintenance concept

ECO ₂ Middle	MT	LT
Cooling capacity min./max. (kW)	60-150	0-50
Compressors	max. 4	max. 3

ECO2SMALL PACK

ECO2Small refrigeration pack is designed for applications in small to medium size stores. The cooling capacity can be adjusted from 35kW to 106kW for medium temperatures and from 5,5kW to 23 kW for low temperature applications.

KEY BENEFITS:

- Very compact product
- Modular design for manutention and complex installation
- Booster BLTand MT
- High pressure oil solution from EPTA.
- ETE and FTE performing systems available on this platform
- Easy maintenance concept

ECO2Small	MT	LT
Cooling capacity min./max. (kW)	40-100	0-25

Service

Epta is a complete system provider supplying turnkey commercial refrigeration solutions. Apart from its range of products, it also offers a variety of after-sales technical assistance services through its specialist brand, EptaService, ensuring customer efficiency and continuity.

A smooth workflow, efficient processes and uninterrupted operations are vital for Retail, Food & Beverage, Ho.Re.Ca. and Industrial businesses that are sure to rely on seamless technical assistance.

EptaService offers expert and proactive support through the innovative LifeCycle Program: competent consulting which embraces a wide range of services,

during the entire lifecycle of products and store. Many strong points for the benefit of the client: adoption of evolved digital technologies focused on maximum connectivity, which results in a greater and more efficient duration of the equipment and a reduction in Total Cost of Ownership.

The LifeCycle Program is available to clients through two complete assistance plans to ensure maximum efficiency, quality, and reliability: Main and Xtend.

Main – Maintenance and Service Program is the complete maintenance and service plan for existing systems and equipment

XTend – Extended Warranty Program is a premium offer dedicated to new projects which allows to access digital platforms and use of advanced remote diagnostics for all the solutions.

SWITCHON **DIGITAL DIAGNOSTICS**

SwitchON is an innovative diagnostic platform which ensures access to remote display refrigerators and refrigeration systems from afar: the system includes advanced functions together with predictive maintenance algorithms, synonymous with security and reliability for Retailers.

As regards refrigeration systems, the platform guarantees remote monitoring of compressors, inverters, oil injection devices, gas coolers and regulating valves. To guarantee ever-efficient operation of the display refrigerators, SwitchON makes available technical information on temperature, humidity and defrosting.

Finally, the platform integrates a monitoring system able to identify in real time any anomalies which are reported by specific alarms on components that require assistance, with an evident reduction of intervention times and related costs. Technicians can rely on a user-friendly guide, which is complete and effective for the rapid restoration of equipment operation

KEY BENEFITS:

- Asset overview: type and number of products and stores
- Level of consumption by stores and related CO2 emissions
- Consumption forecast based on weather conditions
- Overview of health status of equipment (alarms and preventive warnings)
- Updated Service agreement information
- HACCP prescriptions compliant

Concept ideas

A service dedicated to creating bespoke environments

Driven by passion and creativity, EptaConcept, a service provided by Epta Group, is a unique concept of a multidisciplinary design center specialized in crafting tailored environments, from cabinet customization to complete store concepts.

At the heart of our design philosophy lies a deep commitment to a human-centred approach. We prioritize understanding and finding answers to real people's needs, desires, and behaviors, transforming spaces accordingly. Our Mission is To Transform Spaces Into Experiences, to create concepts that are desirable, viable and feasible by considering the aesthetical factor, efficiency factor and profitability factor.

The EptaConcept team works with our Clients at all design phases, from the needs analysis through to the tailor-made design, from the selection of furnishings to the installation.
